- **Question 2:** Is the candidate gene involved in an immune signalling pathway, i.e. a pathway that is immune cell-specific or a generic pathway known to operate in immune cells (e.g. the JAK-STAT, MAPK, NF-kappa B or TNF signalling pathways)?

You can also consider blood cell-specific pathways like leukaemias.

• Que te gustó + y qué -?

⊕ hay mucha info. centralizada de manera que no
tiene que estar de un lado o otro, y que sabes
que todo está centralizado

⊕ lo justo mucho le parte de las publicaciones y
a veces es complicado y pesado leer la
buena parte bibliográfica de las últimas publicaciones

• Que cambiarías?

⊖ Sería posible poner los datos más relevantes para mí?

Es decir → variantes previas de cada pm y un link
a una BD donde se enumeren las frecuencias
alíticas en poblaciones.

• ¿Más?

— Que se pueden analizar listas.
